

REMARKS

Applicant has cancelled claims 1-5 and 9 and amended claim 8 in order to overcome the Examiner's objection. Claim 10 is dependent on claim 8 and should therefore be allowable without amendment. Applicant is also submitting a proposed new Figure 5 which should overcome the Examiner's objection to the drawing. In connection with the new Figure, Applicant rewrote the paragraph bridging pages 5 and 6 of the specification. As amended it is clear that the tube 50 is not encircling the outer surface of the screw nut 31 but is disposed within the cavity 33. No new matter has been entered.

In view of the above, it is respectfully submitted that the above changes places the application in condition for allowance. Accordingly, prompt favorable action is requested.

Respectfully submitted,

Date: February 4, 2004
